In an age of rapid advances in behavioural genetics, this book applies a unique genetic-social framework to the study of crime and criminal behaviour in areas such as critical criminology, masculinities and crime, feminist criminologies, postmodernism and post-structuralism. Moving beyond the existing theoretical obstacles confronting criminological theory including biophobia and the oversocialised gaze, this book draws upon evidence from evolutionary psychology and behavioural genetics to provide an up-to-date and more balanced account of the mutuality between genes and environment. Owen acknowledges that biological factors may 'switch on' genetic impulses to generate behaviour that can be labelled as 'criminal' when they interact with other social and psychological factors, and also considers human beings as reflexive agents with the agency to choose not to engage in criminal activities where they believe that the rewards are outweighed by negative outcomes or actions which offend moral prohibitions. Providing a new direction for criminological theorising, this book will appeal to scholars of Criminology, Sociology, Social Policy, Psychology and Philosophy.

Criminology is in a period of much theoretical ferment. Older theories have been revitalized, and newer theories have been set forth. The very richness of our thinking about crime, however, leads to questions about the relative merits of these competing paradigms. Accordingly, in this volume advocates of prominent theories are asked to "take stock" of their perspectives. Their challenge is to assess the empirical status of their theory and to map out future directions for theoretical development. The volume begins with an assessment of three perspectives that have long been at the core of criminology: social learning theory, control theory, and strain theory. Drawing on these traditions, two major contemporary macro-level theories of crime have emerged and are here reviewed: institutional-anomie theory and collective efficacy theory. Critical criminology has yielded diverse contributions discussed in essays on feminist theories, radical criminology, peacemaking criminology, and the effects of racial segregation. The volume includes chapters examining Moffitt's insights on life-course persistent/adolescent-limited anti-social behavior and Sampson and Laub's life-course theory of crime. In addition, David Farrington provides a comprehensive assessment of the adequacy of the leading developmental and life-course theories of crime. Finally, Taking Stock presents essays that review the status of perspectives that have direct implications for the use of criminological knowledge to control crime. Taken together, these chapters provide a comprehensive update of the field's leading theories of crime. The volume will be of interest to criminological scholars and will be ideal for classroom use in courses reviewing contemporary theories of criminal behavior.

Criminological Theory: The Essentials, Third Edition offers you a brief yet comprehensive overview of classic and contemporary criminologists and their theories. Putting criminological theory in context, acclaimed author Stephen G. Tibbetts examines policy implications brought about by theoretical perspectives to demonstrate to you the practical application of theories to contemporary social problems. New to the Third Edition: A new chapter dedicated entirely to feminist perspectives (Chapter 10) introduces you to feminist models of crime while underscoring the importance of examining the related research. Case studies that examine offender motives are now included to help you apply the theories discussed to interesting and memorable examples. Policy is now integrated into each section to allow you to see the practical policy implications of each theory. Coverage of critical topics has been expanded throughout to introduce you to important issues, such as the influence of employment on criminal behavior, the success of school programs in reducing delinquent behavior, and federal sentencing guidelines in regard to crack versus powder cocaine. Statistics, graphs, and tables have all been updated to demonstrate the most recent trends in criminology.

By focusing on key ideas in both criminology and criminal justice, this book brings a new and unique perspective to understanding critical research in criminology and criminal justice -- heretofore, the practice has been to separate criminology and criminal justice. However, given their interconnected nature, this book brings both together cohesively. In going beyond simply identifying and discussing key contributions and their effects by giving students a broader socio-political context for each key idea, this book concretely conceptualizes the key ideas in ways that students will remember and understand.

An indispensable international resource, The SAGE Handbook of Criminological Theory provides readers with a clear overview of criminological theory, enabling them to reflect critically upon the traditional, emergent and desirable theoretical positions of the discipline. This handbook is essential for libraries and scholars of all levels studying the rapidly developing, interdisciplinary field of criminology.

In Criminological Theories, the noted criminologist Ronald Akers provides thorough description, discussion, and appraisal of the leading theories of crime/delinquent behavior and law/criminal justice - the origin and history of each theory and its contemporary developments and adherents. Akers offers a clear explanation of each theory (the central concepts and hypotheses of each theory as well as critical criteria for evaluating each theory in terms of its empirical validity). Researchers and librarians, as well as general readers, will find this book a very useful tool and will applaud its clear and understandable exposition of abstract concepts.

An Introduction to Critical Criminology offers an accessible introduction to foundational and contemporary theories and perspectives in critical criminology which introduces students to theories and perspectives about the causes of crime, and the operation of the criminal justice system.
