~~An Introduction to UNIX/LINUX~~

~~Most UNIX systems have a standard layout for files, so that system resources and programs can be easily located. This layout forms a directory tree, which starts at the ``/' directory, also known as ``the root directory''. Directly underneath / are some important subdirectories: /bin, /etc, /dev, and /usr, among others. These directories in turn contain other directories which contain system configuration files, programs, and so on.~~

~~An Introduction to UNIX~~
