This book provides a critical understanding of contemporary world politics by arguing that the neoliberal approach to international relations seduces many of us into investing our lives in projects of power and alienation. These projects offer few options for emancipation; consequently, many feel they have little choice but to retaliate against violence with more violence. The authors of this pioneering work articulate worldism as an alternative approach to world politics. It intertwines non-Western and Western traditions by drawing on Marxist, postcolonial, feminist and critical security approaches with Greek and Chinese theories of politics, broadly defined. The authors contend that contemporary world politics cannot be understood outside the legacies of these multiple worlds, including axes of power configured by gender, race, class, and nationality, which are themselves linked to earlier histories of colonizations and their contemporary formations. With fiction and poetry as exploratory methods, the authors build on their 'multiple worlds' approach to consider different sites of world politics, arguing that a truly emancipatory understanding of world politics requires more than just a shift in ways of thinking; above all, it requires a shift in ways of being. *Transforming World Politics* will be of vital interest to students and scholars of International Relations, Political Science, Postcolonial Studies, Social Theory, Women's Studies, Asian Studies, European Union and Mediterranean Studies, and Security Studies.

Provides a new framework for reconceptualizing the historical and contemporary relationship between cultural diversity, political authority, and international order.

Virtually all pertinent issues that the world faces today – such as nuclear proliferation, climate change, the spread of infectious disease and economic globalization – imply objects that move. However, surprisingly little is known about how the actual objects of world politics are constituted, how they move and how they change while moving. This book addresses these questions through the concept of 'translation' – the simultaneous processes of object constitution, transportation and transformation. Translations occur when specific forms of knowledge about the environment, international human rights norms or water policies consolidate, travel and change. *World Politics in Translation* conceptualizes 'translation' for International Relations by drawing on theoretical insights from Literary Studies, Postcolonial Scholarship and Science and Technology Studies. The individual chapters explore how the concept of translation opens new perspectives on development cooperation, the diffusion of norms and organizational templates, the performance in and of international organizations or the politics of international security governance. This book constitutes an excellent resource for students and scholars in the fields of Politics, International Relations, Social Anthropology, Development Studies and Sociology. Combining empirically grounded case studies with methodological reflection and theoretical innovation, the book provides a powerful and productive introduction to world politics in translation.

This book engages the view that students of International Relations need to break with the habit of defining power in terms of military capabilities of states. Featuring contributions from both upcoming and distinguished scholars, including Steven Lukes, Joseph Nye, and Stefano Guzzini, it explores the nature and location of 'power' in international politics through a variety of conceptual lenses. With a particular focus on the phenomenon of 'soft' power and different types of actors in a globalizing world, fifteen chapters assess the meaning of 'power' from the perspectives of realism, constructivism, global governance, and development studies, presenting discussions ranging from conceptual to practical oriented analyses. *Power in World Politics* attempts to broaden theoretical horizons to enrich our understanding of the distribution of power in world politics, thereby also contributing to the discovery and analysis of new political spaces. This is essential reading for all advanced students and scholars of international relations.
